### **Keynote Address**

Harold Slavkin, DDS, Dean, USC School of Dentistry

*Beyond Access to Care ~ The Role of Family and Community in Children's Oral Health*

### **Presentation**

David Kittams, MD, Pediatrician, Berkeley, CA

Dental Health Foundation Board Member

*A Shared Imperative to Advance Children's Oral Health*

### **PROGRAM OBJECTIVES**

1. Define community and family needs in identifying problems and solutions for oral health access as it relates to children's overall health.
2. Identify paradigms to promote health and integrate children's oral health into other health and social programs.
3. Identify family, academic and community partnerships to provide oral health education and prevention programs for children and families to reduce the incidence of early childhood caries.
4. Identify different approaches to children's oral health care at the community level with collaborative funding initiatives (private-public initiatives including opportunities for federal/state sponsorship).
5. Develop a mission/vision to initiate and sustain an Oral Health Program for the children of San Luis Obispo County to establish accessible, quality and timely pediatric dental care, especially for our most vulnerable population of children.
